

South Otago High School SOHS Careers

For students at the end of their time at school it is the time of year to start applying for scholarships and for any future courses or gap year programmes. Have a look through the newsletter and careers site to see just a few of the opportunities available to you when you finish your time here with us at SOHS.

For students who still have time here at SOHS this newsletter contains some great career and pathway ideas, events (such as Hands on Otago), and general careers advice. Just browsing the current scholarships can also give you an idea of potential pathways or something to aim for going forward with your learning.
